SUMMARY

A motivated and diligent professional, eager to innovate existing technologies, seeking an innovative and challenging environment to fully leverage my capabilities.

WORK EXPERIENCE

Currently contributing to Ameriprise Financial with 2 years of experience.

Ameriprise Financial (Payroll: IBM Kyndryl) **Nov 2025 - Current**
Role: Associate Engineer (Cloud Monitoring)

- Provide L2/L3 technical support to Ameriprise Financial users, handling escalated incidents and service requests.
- Monitored application health and availability across containerized and cloud environments.
- Monitored Kubernetes workloads (Pods, Deployments, Services) to ensure stable and reliable application performance.
- Developed all CI/CD jobs in Groovy using Jenkins files, with job execution on Docker container agents.
- Assisted in incident response, triaging alerts, performing first-level troubleshooting, and escalating when required.
- Supported cloud infrastructure on AWS EC2, including instance monitoring and security group configurations.
- Monitor and respond to endpoint security alerts using Carbon Black.
- Followed ITIL processes using ServiceNow for incident, change, and problem management.
- Collaborated with development and infrastructure teams to support deployments and production issues
- Documented deployment steps, troubleshooting procedures, and operational run books.

Marsh McLennan (Payroll: Microland) **June 2024 – Nov 2025**
Role: Service Desk Engineer L1

- Contributed to Marsh McLennan projects while employed through Microland payroll, gaining 2 years of professional experience.
- Managed and resolved tickets using ServiceNow, ensuring accurate documentation of issues and timely resolution within SLA
- Provided technical support for virtual environments, including Virtual Machine (VM) provisioning, troubleshooting, and performance optimization.
- Identified and terminated unnecessary or malicious sessions to maintain system security and prevent resource overutilization
- Collaborated with cross-functional teams to escalate and resolve complex technical issues efficiently. Conducted root cause analysis for recurring issues, ensuring preventive measures were implemented.
- Virtual Machine, VDI, Service Now, Troubleshooting, Desktop Services.

Technical skills

- **Cloud & Infrastructure** - EC2 (Servers, SGs, ALBs, AS Groups), VPC, Route 53, S3, IAM, CloudWatch, VPC, EKS, ECR, Lambda etc.
- **Containers & Orchestration:** Docker, Kubernetes, Helm, ArgoCD
- **Identity & Access Management -** Active Directory, CyberArk
- **Automation & Configuration Management -** Ansible, Terraform
- **Virtualization & VDI Technologies -** VDI, Citrix, VMware, vSphere
- **Endpoint Management & Security-** Microsoft Intune, Carbon Black
- **Scripting -** Python, Shell
- **ITSM & Tools**- ServiceNow
- **Database**- MongoDB, SQL

Projects

Kube Pipeline **Oct - Nov 2024**

- Developed a complete CI/CD pipeline enabling automated integration, build, and deployment of a Django application.
- Configured GitHub webhooks to trigger Jenkins pipelines, automating Docker image builds and pushing them to Docker Hub.
- Automated deployment using Ansible, provisioning containers to a Kubernetes cluster hosted on AWS EC2 instances.
- Ensured seamless delivery by integrating containerization (Docker), orchestration (Kubernetes), and infrastructure automation (Ansible).
- Improved release cycles by reducing manual intervention and providing a production-ready deployment workflow.

Education

BCA in Computer Application from PSIT College of Higher Education from Kanpur - 2021 - 2024 (CGPA: 7.9)

Certification

- AWS Cloud Practitioner Essentials by AWS
- Technology Virtual Experience Program by Deloitte
